Looks like I need to turn auto correct off or take more time

Mary et al,

As of 2130 on 8/13 there have not been enough developments to warrant a coordination meeting tomorrow morning. The following is the only update I have:

- Region 6 has not additional staffing needs at this team. They are still considering community involvement staff but they have 3 of their own in the queue
- The OSWER Safety Officer in coordination with SHEMD have decided ALL positions, due to long hours and potentially stressful conditions, will require 24-hour H&S training and at least a medical screening...they are working to fix the FOH contract problem with getting screenings done within 48 hours of request
- We have set up a site for posting information for R7 deployments: www.epaossc.org/r7supportr6goldking
- It is a private site and you will need an account to log in and access...follow the instructions when you try to access the website or contact ERTSupport@epa.gov if you need an account

Ex. 2 - Internal Rules and Practices of Agency
